🚜 Sowing time! 🌱

As reported in previous posts, the Avenue project aims to develop higher quality [#oat](#) varieties suitable for [#organic](#) [#farming](#). Starting yesterday, 180 seed samples of oats from NordGen and 20 modern cultivars will be sown. After harvest, the quality of the material will be analyzed at [The James Hutton Institute](#) in Scotland. In addition to [NordGen](#), the other partners in the project are [Innovation Centre for Organic Farming](#) and [Center for Quantitative Genetics and Genomics - Aarhus University](#). The project is funded by [Novo Nordisk Foundation](#).
