## Research, skills and experience

Education as a wildlife biologist in 1998, specialised in behaviour and population biology. Expertise in agricultural related biodiversity, EU-CAP and waterfowl wintering ecology. More than 15 years of experience with biological projects as project leader, partly as self-employed nature advisor, but primarily as employed in Danish green NGO's. Led the pilot project Field Ecospace: Consideration of nature in organic farming (funded by the Danish Agricultural Agency, 2023), and involved in the following current Organic RDD9 project EcoMetric: Building a framework for developing a dynamic metric to measure farmland biodiversity in a spatio-temporally changing

landscape and Organic RDD7 project Organic+: Demonstrating and improving the benefit of organic farming on biodiversity and the environment with ICØL employment. Previously led the Naturkvæg project (Kvægafgiftsfonden, 2021). Led Markernes Naturpotentiale (Promilleafgiftsfonden 2019), Dyrevelfærd i Naturaforgræsningen (Kvægafgiftsfonden 2019), Kompetenceopbygning på Biodiversitetsgårde (the Danish Agricultural Agency 2018) as well as Økologisk hønnikeopdræt med kunstige kyllingemødre (Fjerkræafgiftsfonden, 2017-2018) under Organic Denmark employment. Took part in Naturstrategi for Organic Denmark, 2017. Lectured at the Wildlife Manager study programme (University of Copenhagen / Skovskolen 2021 and 2023) and on the topic field wildlife management (Skovskolen, part of course, 2016-2018), participated in Lokal forvaltning af overvintrende gæs (part I and II, 15. Juni Fonden, 2017 and 2019) and Bæredygtigt opdræt af fasaner til jagt (Fjerkræafgiftsfonden, 2017-2018) as a self-employed nature advisor. Took part in Økologisk Rum project (AVJF and 15. Juni Fonden (2015-2016), Markvildt project (Danish Environment Protection Agency, 2013-2016), Vildtforvaltning og miljøbeskyttelse i Fehmern Bælt regionen (EU-Interreg 2011-2013), and Søvsø project (SNS 2010-2012) as game and wildlife consultant with The Danish Hunters Association. Led Metoder til monitorering af lokale vildtbestande project (Haretælling Himmerland, 2010-2013), participated in Dokumentation af overlevelse for udsat fuglevildt project (Vennerlund Gods, 2008-2010), and took part in strategic work (Natura 2000-indsats, 2009-2015 and Trækvildtstrategi, 2015).
